## MORE ACCURATE METHOD THAT APPLIES TO ANY PLACE IN THE WORLD

It is not advisable to determine Qibla using compass specially for Orienting Masjid. The following method which uses the sun is more reliable. It has been observed for centuries and reported in many books by Muslims around the world that two times a year the sun comes overhead above Ka'bah. This is observational fact for centuries, and is used to set the correct Qibla direction in places far from Makkah by Muslims for last so many centuries. Those two dates and times are :  
May 28 at 9:18 UT and July 16 at 9:27 UT ( UT =GMT)
